

This study focuses on designing and implementing a QR code-based attendance system. The scope includes:

- Analysis of existing attendance methods and identifying their limitations.
- Design and development of a software solution incorporating QR code technology.
- Implementation of security measures to protect attendance data.
- Testing the system for performance, usability, and security.
- Evaluation of the system's effectiveness in a real-world educational setting.

SCOPE OF THE PROJECT

Jain College of Engineering and Technology, Hubballi

Attendance Portal

Student Count: 0
